

Input

key = 5

iv = 10

p1 = int(input("Enter first block: "))

p2 = int(input("Enter second block: "))

Encryption (CBC)

c1 = (p1 ^ iv) ^ key

c2 = (p2 ^ c1) ^ key

print("Encrypted:", c1, c2)

Decryption

d1 = (c1 ^ key) ^ iv

d2 = (c2 ^ key) ^ c1

print("Decrypted:", d1, d2)

Output

```
Enter first block: 6
Enter second block: 5
Encrypted: 9 9
Decrypted: 6 5
```
