

Input

```
key = 5
counter = 0

p1 = int(input("Enter block 1: "))
p2 = int(input("Enter block 2: "))
p3 = int(input("Enter block 3: "))

# Encryption
c1 = p1 ^ (counter + 0) ^ key
c2 = p2 ^ (counter + 1) ^ key
c3 = p3 ^ (counter + 2) ^ key

print("Encrypted:", c1, c2, c3)

# Decryption
d1 = c1 ^ (counter + 0) ^ key
d2 = c2 ^ (counter + 1) ^ key
d3 = c3 ^ (counter + 2) ^ key

print("Decrypted:", d1, d2, d3)
```

Output

```
Enter block 1: 3
Enter block 2: 43
Enter block 3: 87
Encrypted: 6 47 80
Decrypted: 3 43 87
```
